

Workrolls ♦ Backup Rollers  
Cylindrical Roller Bearings

**Quick, personal responses, at the design and improvement stage, for motion related products and applications.**

## WHO WE ARE

*TECOM Inc.*, established in 1997, is a Canadian based manufacturer and distributor of specialized bearings, work rolls and backup rollers, selling primarily into the North American market. We excel in offering quick, personal responses, at the design and improvement stage, for custom made bearings for medium and large industrial applications. These applications have included:

- lift truck columns
- mining applications
- steel industry applications
- military applications
- drilling equipment
- oil industry applications
- horizontal and vertical handling systems
- heavy automation systems
- nuclear industry applications
- food industry applications

We follow up our product sales with generous in-stock levels and quick deliveries. We also offer short lead times to the steel industry for work rolls and backup rollers.

All products are backed up by years of experience in design and practical application. They can be found in major installations all over the world and can be custom designed and built for your specific application.

**TECOM Inc.**
